

# Hygienic Fiber Face Mask Best Practices

Thank you for using a Ruby Lake Hygienic Fiber Face Mask!

This mask has been engineered to provide a top quality filtration layer while staying soft and breathable. As it is a rewashable mask, proper maintenance and cleaning will help it to last as long as possible.

## How do I clean my mask?

There are a few different ways you can clean your mask:

### HAND WASH

Just like washing your hands, wash the soap in warm, soapy water for 30 seconds

### MACHINE WASH

To protect the mask, we recommend you **ONLY** machine wash the mask in a laundry bag or mesh bag . If you do not have a laundry bag, please do not machine wash mask

### SINK OR BASIN

Fill a sink or basin with warm water and a light detergent or soap and wash the mask for at least 30 seconds

## Drying Method

Hang dry for 1-2 hours for best results

## How many times can I wash my mask?

We engineered the mask to withstand 30-50 wearings total, but with proper care and attention it can last much longer!

Here are things to look out for to know your mask is needing a replacement:

- 1) Loose ear straps
- 2) bagged out, thinning fabric
- 3) loss of tension

**30 - 50 WASHINGS**

In very dusty environments, the mask may become overloaded with dust or loose particles caught up in the mask and it may cause discomfort. If the dust will not dislodge with a gentle shake or blow of air, then replace the mask with another or wash using the **HAND WASH** method above to ensure good health and hygiene.
